

JOÃO VEDOR

Software Developer |
Bioinformatics & Biomedical NLP

Curious about how systems work - and
motivated by building things people can
genuinely use.

Lisbon, Portugal

About me

Computer Engineer with a Master's specialization in Bioinformatics. I enjoy turning complex problems into clear, useful tools - whether that means building a web application, improving a database workflow, or exploring how AI can connect biomedical text with structured knowledge. My experience combines full-stack development, databases, and DevOps, and I value teams where I can keep learning while contributing practical solutions.

What I work with

Code

Python, Java, JavaScript, SQL

Web

Node.js, React, Tailwind CSS

Data

SQL, NoSQL, ontologies, knowledge bases

Cloud & DevOps

Azure DevOps, Docker, AWS, Cloudflare,
Vercel

AI & Bioinformatics

LLMs, biomedical NLP, entity linking

Everyday tools

Git, GitHub, debugging, deployment

Experience *how I have applied my skills*

Full-Stack Developer | **Câmara Municipal de Lisboa** ·
Lisbon

[Add dates]

- Contribute to an Azure DevOps framework and pipeline designed to make application delivery more consistent and reliable.
- Help build and maintain internal applications, working across application logic, databases, deployment, and support.
- Work with colleagues to understand operational needs, troubleshoot issues, and turn requirements into practical technical solutions.

IT Specialist Intern | **Câmara Municipal de Lisboa** ·
Lisbon

[Add dates]

- Developed and maintained full-stack applications used in internal organizational processes.
- Designed and optimized database structures and SQL workflows supporting application requirements.
- Supported deployments, maintenance, and day-to-day troubleshooting, gaining end-to-end exposure to how systems run in practice.

Full-Stack Developer | **Inboxsys Sistemas de
Informação, Unipessoal Lda** · Portugal

[Add dates]

- Worked on a web application using Node.js, React, and Tailwind CSS.
- Built and refined frontend components while supporting backend integration and application behavior.
- Used GitHub for collaborative development and Vercel for deployment.

Education

Master's Degree in Computer Engineering | **Faculty of
Sciences, University of Lisbon (FCUL)** · Lisbon

[Add years]

Specialization in Bioinformatics

Thesis: *Semantic Indexing of Descriptors, Partitioning and Classification for Mapping Biomedical Entities*

Bachelor's Degree in Computer Engineering | **Faculty
of Sciences, University of Lisbon (FCUL)** · Lisbon

[Add years]

Selected research *the project behind my thesis*

XMR4EL - Biomedical Entity Linking | **Open-source
Master's thesis project**

GitHub

- Studied semantic indexing, descriptor partitioning, and classification methods for mapping text to biomedical entities.
- Explored entity linking as an extreme multi-label ranking problem using representation learning, ranking strategies, and biomedical ontologies.
